## Custom Fittings Available Upon Request

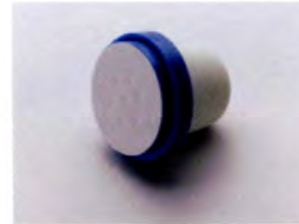

## QMI Septa

The QMI Septa are equipped with 7 individual needle guide channels. Pierce each channel once with a needle to withdraw a sterile sample. Once all channels have been used, the septa should be replaced. These septa fit inside the QMI stainless steel 7-Port fittings. Standard Operating Procedures can be found on our website at [www.qmisystems.com](http://www.qmisystems.com)

**Aseptic Septum**  
110011

**Aseptic Septum**  
**High Temp Applications (up to 280°F)**  
**(silicone material)**  
110021

**Aseptic Probe Septum**

Aseptically place temperature probes, pH probes, oxygen sensing probes and other similar products that measure various perimeters for processing  
110031
