

Proper Needle Insertion into QualiTru™ Septum

1
Line the hypodermic needle up with the channel you plan to use.

2
Face the bevel of the needle outward, or toward the outer ring.

3
Slowly push the hypodermic needle until you meet resistance.

4
Gently continue through the rubber until you can push no further.

5
Do not spin or twist on the way through, as you could core the rubber.
