

**QUALITRU**  
SAMPLING SYSTEMS

## INTRODUCING THE **TRU**STREAM DRUM PORT

The TruStream™ Drum Port is designed for the quick and safe extraction of samples from barrels, drums, and totes without exposing the product to airborne contaminants. It seamlessly replaces the standard NPS Bung Plug and is compatible with all TruStream7 Septa. This highly durable drum port can handle temperatures up to 190°F and is capable of withstanding pressures up to 30 psi and vacuum pressures down to -2.5 PSI.

### BENEFITS OF OUR TRUSTREAM DRUM PORT

- **Ease of Use:** Quickly and easily replaces the NPS bung plug in the barrel to safely and quickly withdraw samples through the septum in the drum port.
- **Prevent External Contamination:** Fully contained sampling system allows for aseptic sampling to mitigate external contamination and exposure to air, maintaining the purity and quality of your product.
- **Safety Standards:** FDA Food Contact Compliant, BPA Free, and Phthalate Free.

**Quick. Safe. Durable**

Protect your product from  
airborne contamination.
