Pump

QUALITY

FEED RATION VERIFICATION CHECKS

- Correlate feed rations to milk quality
- Measure butterfat, protein and other components to ensure a quality product for your buyer

HYGIENE

CONTAMINATION & BIOFILM DETECTION

- Identify contamination early with sample sites in key locations
- Proactive testing will save time, lower tear down costs and reduce disrupted production schedules

REPRESENTATIVE
SAMPLE**

That Business Decisions
Can Be Made From.

1

Port

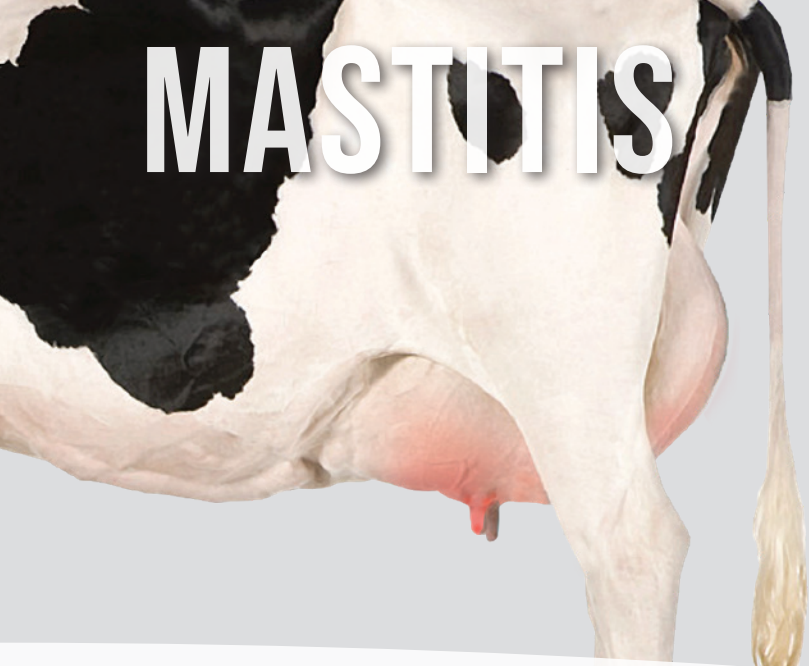

2

Septum

MASTITIS

STRING SAMPLING

- Catch mastitis while it is still subclinical
- Use as a diagnostic tool to complement your farm Quality System
- Monitor pen somatic cell count
- Facilitate the identification of mastitis causing pathogens

PAYMENT

REPRESENTATIVE SAMPLE VIA OUTLET VALVE

- Obtain a true representative sample without the need for agitation
- Decreases human errors
- System is simple and easy to use
